OBJECTIVES

Data Scientist and Cloud Data Engineer with 3.5 years of hands-on experience in predictive modelling, data mining, and scalable data solutions. Proven track record at Aviato Consulting, leading GCP migration projects to enhance automation and performance. Highly proficient in Python, with deep experience in developing end-to-end data pipelines, APIs, and machine learning models. Adept at using Python for data processing, automation, and building analytical tools that drive measurable business impact, particularly in marketing analytics. Eager to contribute to a fast-paced, growth-oriented environment while continuously sharpening my technical and analytical skills.

PROFESSIONAL EXPERIENCE

AVIATO CONSULTING PTY. LTD., Sydney, Australia

Oct 2021 – Dec 2025

Data Scientist - Backend Developer

- Leading the migration of legacy Alteryx workflows to Google Cloud Platform (GCP), improving automation and scalability.
- Designing and deploying data pipelines using BigQuery, Cloud Storage, and Apache Beam for optimized data ingestion and processing.
- Collaborating with cross-functional teams to ensure business logic and KPIs are accurately retained during migration.
- Building internal APIs and backend workflows using FastAPI and Python to support GCP-based data infrastructure.
- Enhancing data quality and reliability by automating validation and transformation tasks.

INNODATATICS, Telangana, India

Apr 2021 – Sep 2021

Data Scientist

- Improved marketing performance by 50% by driving initiatives such as marketing performance reports and developing new scoring techniques.
- Gained hands-on experience with supervised, unsupervised, and deep learning models.

LEFPRO TECHNOLOGY, Gujarat, India

Aug 2019 – May 2020

Backend Developer - Python

- I have 3 months of internship and 6 months of job experience on this position in the company.
- Worked on Database Design and developing Android mobile applications, making APIs for Front end.
- Coordinate with backend developer and android developer for to-dos.

Android Project

- Family Tracker (Android Application for tracking kids).
- This application helps track your child. Parents can control almost all things that lead to addiction in children using apps. This application was beneficial for parents to track all the child's activities.

EDUCATION

Gujarat Technological University, Gujarat, India

Jul 2016 – Aug 2020

- Bachelor of engineering in computer engineering

PROJECTS

Sentiment Analysis (Classify Reviews using Web Scrapping - Python)

- The objective is to perform text pre-processing and sentiment analysis to check whether the customer review is positive or negative.

Classification of Myocardial Infraction

- The objective is to clean data for the best result and classify which myocardial infarction has parents (eight types of myocardial infarction).

CERTIFICATES

Data Science Certification

2021

ExcelR Solutions

Text Analytics 101

2021
